Tammy Castro

I am an Iron Yard and Trident Technical College graduate with experience in web development, marketing, project management, and Salesforce.

EXPERIENCE

Summerville Orchestra, Summerville — Website Developer and Tech Consultant
July 2017-current

- Developed and maintained Google Cloud Platform server hosting site on WordPress.
- Oversaw implementation of ticket purchasing for events.
- Redesigned website layout and flow for a better user experience.
- Assisted with the development and implementation of online marketing campaigns for the Orchestra with a focus on driving traffic to the website and social media outlets.

Summerville DREAM, Summerville — Website Developer and Social Media Marketer

May 2013–January 2017

- Developed and maintained Amazon Web Service servers that hosted Drupal CMS-based website.
- Researched, sample-tested, and launched implementation of new Salesforce system to replace the previous paper-based membership-tracking system.
- Researched, implemented, and maintained 12 Drupal modules, adding capabilities such as enhanced UI, simplified backups, improved image-handling and presentation, search engine optimization, and enhanced forms.
- Oversaw implementation of volunteer-tracking database and reporting system.
- Managed cloud data conversion using Box and Google Drive.
- Captured the individual tasks, time-lines, dependencies, milestones, and deadlines involved in running a successful event in a Microsoft Project based project plan.
- Created and maintained process and procedure documentation, including static and screen-cast-based content.

EDUCATION

The Iron Yard, *Charleston — Certificate of Completion*
May 2017–August 2017
I learned how to take a design for a web site or API from concept to production using Node, JavaScript, ReactJS, and responsive web design.

Trident Technical College, North Charleston—*AAS Computer Technology — Computer Programming*
Spring 2017
In addition to the Associate's Degree, earned the following certificates: Database, Internet Programming, Microcomputer Business Applications, and Microcomputer Programming.
